

Configure Database Vault for PDB

Pluggable Database (PDB1)

Connect as Admin to PDB1

```
Alter session set container=pdb1;
```

Verify if Label Security and Database Vault are Installed & Configured

```
SELECT * FROM SYS.DBA_DV_STATUS;  
  
SELECT * FROM DBA_OLS_STATUS;
```

Select Data from HR Schema

```
# create schema from $ORACLE_HOME/demo/schema/human_resources/hr_main.sql  
  
select EMPLOYEE_ID,FIRST_NAME,LAST_NAME,SALARY from hr.employees ;
```

#Configure Database Vault

```
BEGIN  
CONFIGURE_DV (  
  dvowner_uname      => 'c##dv_owner_root',  
  dvacctmgr_uname    => 'c##dv_acctmgr_root');  
END;  
/
```

Connect as DV Owner User(c##dv_owner_root)

```
connect c##dv_owner_root@pdb1  
  
EXEC DBMS_MACADM.ENABLE_DV;
```

Restart the Pluggable Database

```
Alter pluggable database pdb1 close;
```

```
Alter pluggable database open;
```

Verify if Label Security and Database Vault are Installed & Configured -

```
SELECT * FROM SYS.DBA_DV_STATUS;
```

```
SELECT * FROM DBA_OLS_STATUS;
```
